ADVANTAGES OF FOAM

Contact time maximizes chemistry's effectiveness

Visual marker for equipment operator

Expansion rates reduce water and chemical usage

Reduces labor costs

Central Door Foam Unit

SPECIFICATIONS

12 feet by 5 feet potential coverage area

Runs on pump fed pre-mix chemical

All stainless steel foam enhancer assembly

Fiberglass locking hinged box

The twin tube design allows for increased distance between the station and the spray tip assembly. The new foam enhancing nozzle is constructed of Stainless Steel and produces twice the amount of foam as our GK6T, which allows for shorter run times and a larger coverage area of foam. The GK5T can operate up to two nozzle assemblies at a time.
