

Foam and Sanitize Unit

For concentrate products

Unit includes separate foam and sanitize systems built inside a shared enclosure

Foam system dilutes product at ratios of 14:1 to 320:1

Spray system dilutes product at ratios of 15:1 to 512:1

Both systems regulate incoming water pressure to ensure consistent dilution

Separate hoses make it easy to switch between functions – or use both functions simultaneously in different areas

No shared wetted components

Save space with two systems in one enclosure

Item Number: FISP-WC
