

# Flooded Suction Tank

Provides a consistent-pressure feed for metering pumps or other equipment

Improves accuracy by evening out pressure variations that occur when drawing from a drum, tote, or bulk tank

Prevents loss of prime due to gassing off

Four discharge valves

2.6 gallon (10 liter) internal reservoir with level sensor

Overflow port

Kalrez pump seals (also available in Santoprene or Viton)

Operates on 24 VDC power (with included transformer) and compressed air

Item Number: FSTK
