

Heated aqueous parts washer

heats to 105 degrees

A manual parts washer that uses aqueous solution rather than solvents. Easier on your hands, your parts, and the environment. Aqueous solution heats in order to better clean your parts.

- Designed to work with most aqueous solutions
- Solution heats to 105°F for improved efficacy
- Separate heater and flow controls allow solution to stay hot all day and save energy in off hours
- 20 gallon (75.7 liter) capacity
- 18x30 in (45.7x76.2 cm) sink
- 36 in high work surface
- Flow through brush and flexible spigot
- Adjustable fluid control - flow to either brush, spigot, or both
- Sink drain grate and filter bag to catch small parts
- Easy access 250 micron filter
- Lid with hold-open support limits evaporation
- Designed for serviceability
 - Easy pump module access
 - Sloped interior base to collect sediment
 - Round interior corners for easy reservoir cleaning
