

Portable Foam Unit

2.6 gallon

Item Number: F100

The convenience of air power, with the small footprint of a manual pump up unit.

Dual operation with manual pump and connection for air supply allows for flexibility in applications

Connect to an air source to pressurize the unit, then disconnect and move the unit to the area being cleaned.

- Produces thick, high quality foam
- 2.6 gallon (10 liter) capacity
- 6 foot (1.8 meter) hybrid TPE discharge hose – lightweight, durable, and chemical-resistant
- Natural color tank for easy visibility of product levels
- Viton seals for chemical compatibility
- Pressure regulator and pressure relief valve for safety
